

Junior Full Stack developer

Our tech teams here at Printerpix are made of smart people looking to solve tough problems and brainstorm new ideas. Our projects focus on the future of Printerpix and customer experiences using a combination of new technologies and new approaches to old technologies.

We're looking for engineers who bring fresh ideas from all areas, including information retrieval, distributed computing, large-scale system design, networking and data storage, security, artificial intelligence, natural language processing, UI design and mobile; the list goes on and is growing every day.

Languages: HTML5, CSS3, C#, Javascript (is not main focus but knowledge is good)

Frameworks: ASP.Net 4-6, MVC, Ajax, JQuery, HTML, Bootstrap and Knockout (required), Angular (optional)

DB's: Ms Sql Server 2012

Testing: Nunit

Tools: Jira, Git and Git Hub, Bitbucket

Practices: Agile, Scrum

The Opportunity:

- **Creating** and updating the user interface enabling our customers to create **beautiful, bespoke** photo gifts on our global webstores
- Creating a project management tool enabling customers to come back to their **personalization** projects without starting the process from scratch.
- Creating a **one click** photobook experience; a thinking system which creates and presents photos and photobooks in the best layout order
- Continuous **optimization** and debugging when adjustments are made to our webstores
- Design and implementation of **next-generation** web applications using Java and C# that can handle web-scale volumes of traffic

What skills do you need?

- Do you have at least 2 years full stack development experience with a focus on front end development?
- Have you worked in a **fast paced** ecommerce environment?
- Have you experience in supporting Web applications with high traffic?
- Are you a **whizz** with scripting languages JavaScript and C# ?
- Experienced in full automation and configuration management?
- Can you help developers own and deliver change from keyboard to customer?
- Can you diagnose and fix complex production issues working with others as necessary?
- Are you a Developer who wants to work in a **cutting edge** & dynamic operations team?
- Can you help continually improve systems to reduce **impact** from technical issues?

- Are you comfortable being on call and working out of hours to provide production support?
- Do you keep your technology skills in tip-top condition through **continual learning**?
- A bachelor's degree in Computer Science or a similar discipline?

Who is Printerpix

Printerpix is and always will be a technology business. We hire people with a broad set of technical skills who are ready to tackle some of technology's greatest challenges and make an impact on millions of our users. At Printerpix, engineers not only revolutionize the world of photo sharing, they routinely work on massive scalability and storage solutions, large-scale applications and entirely new platforms.

As a software engineer, you will work on a specific project critical to Printerpix needs with opportunities to switch teams and projects as you and our fast-paced business grow and evolve. We need our engineers to be versatile, display leadership qualities and be enthusiastic to tackle new problems across the full-stack as we continue to push technology forward.
